

## 7. Write a program to demonstrate how a JUnit sampler script is run in JMeter.

To run a JUnit Sampler script in JMeter, you will need to:

Add a JUnit Request element to the Test Plan. To do this, right-click on the Thread Group node and select Add > Sampler > JUnit Request.

Run the Test Plan. To do this, click the Run button.

JMeter will execute the JUnit test method and store the results in the JMeter Results Tree.
