

8. Demonstrate how to run a Collection using Collection Runner.

To run a collection using Runner in Postman, follow these steps:

Click the Runner button in the top right corner of the Postman window.

Select the collection that you want to run from the list of collections.

Click the Run button.

Postman will start running the requests in the collection in the order that they are listed. You can view the progress of the run in the Runner window.

Once the run is complete, Postman will display the results of the run in the Runner window. The results will include the status code, response time, and body of each response.
