

## 2.Demonstrate how to create the first API request.

To create your first API request in Postman, follow these steps:

1. Open Postman and click on the "New" button in the top-left corner.
2. Choose the HTTP request method (such as GET, POST, or PUT) from the drop-down menu.
3. Enter the URL of the API endpoint you want to send the request to.
4. Add any required headers or parameters for the request.
5. Click on the "Send" button to send the request and view the response.
