5.Write a program to demonstrate how a SMTP sampler script is run in JMeter.

Adding an SMTP Sampler to the Test Plan

To add an SMTP Sampler to the Test Plan, right-click on the Thread Group node and select Add > Sampler > SMTP Sampler.

Running the Test Plan

To run the Test Plan, click the Run button.

JMeter will start the Thread Group and send the emails specified in the SMTP Sampler.

You can view the results of the test in the JMeter Results Tree.
