17. Write a program to demonstrate switch, module, and include controllers in JMeter

To demonstrate the Switch, Module, and Include Controllers in JMeter, you can use the following steps:

Switch Controller

Create a JMeter Test Plan and add a Thread Group.

Under the Thread Group node, add a Switch Controller.

Set the variable that you want to evaluate in the Switch Controller's properties dialog box.

Under the Switch Controller node, add a switch branch for each possible value of the variable.

Add the samplers that you want to execute for each switch branch under the corresponding switch branch node.

Run the test.

Same the module controller and the include controllers the steps wiil be followed.
