10. Create a request, and collections and variables using Postman.

To create a request, collection, and variables using Postman, follow these steps:

Create a collection

Click the Collections tab in the sidebar.

Click the + button to create a new collection.

Enter a name for your collection and click Create.

Create a variable

Click the Variables tab in the collection.

Click the Add button to create a new variable.

Enter a name and value for your variable.

Click Save.
